

### Introduction

The employer (user) bears the responsibility for the health and safety of his employees. This fundamental claim extends also to personnel, which comes into contact with devices and components during repair or service either at user or manufacturer premises.

In the case of using or producing dangerous substances, the contamination of equipment and components has to be marked clearly and filled in the Declaration of Contamination conscientiously.

### Declaration of Contamination

Prerequisite for job execution is a correct and complete Declaration of Contamination.

The Declaration of Contamination has to be sent directly to the manufacturer or the engaged company or handed over to the service personnel on site.

In any case the personnel performing the repair/service must be informed about the status of contaminated devices and components before starting work.

An incomplete or missing Declaration of Contamination will result in no work being undertaken. Furthermore it is assumed that devices and components are still contaminated and will be refused. Any expenses there from will be charged to customer's account.

### Shipment

The original page of the Declaration of Contamination has to be made available to the manufacturer or the engaged company before shipment. (it may also possible to attached the Declaration of Contamination to device or component during shipment)

International and national transport precautions have to be observed at shipment of contaminated devices and components.

The guidelines for the dispatch are:

- Decontamination of devices and components,
- Optimal packaging and marking of goods,
- Dispatch only in suitable transport containers and
- Complete accompanying documents.

Please use the following address for shipment:

**Airsense Analytics GmbH**  
**- Service -**
